

MUHAMMAD UZAIR AFTAB

📍 Fetsund, Norge 📞 +47 412 72 901 ✉️ uzaaft@outlook.com 🐙 github.com/uzaaft 🌐 linkedin.com/in/uzaaft

Software engineer focused on building reliable and fast software products. I work across Rust, TypeScript, web applications, back-end systems, data workflows, and developer tooling, with experience leading technical development in startups, open source, and industry.

LANGUAGES & SKILLS

Docker • DigitalOcean, AWS • Git • High Performance Computing • PostgreSQL, SQLite
Rust, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, SQL, Python

EDUCATION

AUG 2018 – JUNE 2023
Master of Science in Data Science
Norwegian University of Life Sciences, Ås, Norway.
- Specialization in **Physics**

PROFESSIONAL EXPERIENCE

APRIL 2025 – PRESENT	Disruptive Engineering – Software developer <i>Hybrid.</i> - Software developer at Disruptive Engineering, a leading Norwegian technology company specializing in proprietary solutions for data capture and analysis of travel patterns.
SEPT 2024 – PRESENT	Stormwater – Founder <i>Oslo, Norway.</i> - Founded Stormwater in 2024 after getting the STUD-ENT grant from Innovation Norway, aiming to digitalize and streamline the engineering work required to account for stormwater. - Led the technical development, overseeing and coordinating the collaboration between the software developers and the internal stormwater engineer.
MAR 2023 – PRESENT	Polymath AS – Founder <i>Ås, Norway.</i> - Founded Polymath AS in 2023, focusing on efficient full-stack and desktop application development with Rust, and TypeScript.
MAR 2023 – FEB 2025	NMBU - Norwegian university of life sciences – Head Engineer <i>Ås, Norway.</i> - Maintained a low-threshold innovation hub, ensuring accessibility for students. - Led student mentoring and recruitment for Eik Lab, fostering collaboration with industry professionals. - Managed daily operations and provided training on essential infrastructure, including the electronics workshop and Rapid Prototype Lab. - Planned workshops, and hackathons with The Government Pension Fund of Norway and other industry partners. - Guided student projects and supported startups in their technical development.
JAN 2021 – APRIL 2025	Njord Technologies AS – Founder <i>Ås, Norway.</i> - Co-founded and managed Njord Technologies from 2021 to 2023 with Aleksander Eriksen, focusing on full-stack application development primarily in TypeScript.
MAY 2020 – JAN 2021	Norwegian University of Life Sciences – Lecturer and Teaching Assistant <i>Ås, Norway.</i> - Lecturer and Teaching Assistant for the subjects TEL100, TIN100, and TIN200. - Developed teaching materials in the form of video lectures during COVID-19 for Arduino, IoT, Python and Streamlit - Held lectures and aided students with project work within Arduino, IoT, Embedded systems, and High fidelity prototyping.
MAR 2020 – JAN 2021	Ledo AS – Software Developer <i>Ås, Norway.</i> - Planned and executed a technical feasibility study within the field of aqua culture and computer vision.

OPEN SOURCE INVOLVEMENT

COMMUNITY INVOLVEMENT

AUG 2018 –
JUNE 2023

- Eik Lab, formerly Eik Ideverksted**
Norwegian University of Life Sciences.
 - Took on software development projects with industry partners with the goal to attain hands-on experience outside of the curriculum.
 - Held workshops within the field of machine learning, and mentored students interested in fullstack and backend development.
 - Spearheaded the creation of the Eik Lab mentors to improve the experience for new students at Eik Lab.
